

Transform your life and your body

with SOPRANO ICE Laser Hair Removal

The Soprano ICE Laser is the latest in Laser Hair Removal technology. This innovative laser comes with three key benefits: The Soprano provides faster treatments, making it preferable for large areas such as the legs and back. The treatment is virtually painless – gradual heating of the dermis creates a comfortable treatment experience without any

analgesics. The Soprano Laser can safely treat naturally sun tanned skin. Multiple clinical studies have proven the treatment to be the safest method of laser hair removal for all skin types, including dark skin whereby melanin is significantly more sensitive.

Call us or pop in today for a brief chat and we'll endeavour to answer all of the questions you may have.
